WORK EXPERIENCE

Co-Founder & Software Engineer | DevcoLabs Technologies

2022 – 2024

- Co-founded a technology startup, focusing on the development of software products.
- Design and develop full-stack applications from initial requirements through deployment.
- Contribute to system architecture, technical decisions, and product development.
- Collaborate with the founding team to plan features and deliver scalable solutions

Software Engineer | TS Technologies (Pvt) Ltd

March 2024 – Present

- Enterprise delivery: Built and shipped production modules for systems used by 50+ enterprise clients.
- Performance: Optimized rendering and state management in React/Redux, measurably reducing load times and improving cross-platform responsiveness on client-facing dashboards.
- Ownership: Took features from requirement to production independently, including schema design in MySQL and integration with Spring Boot services.

Intern Software Engineer | DirectFN (Pvt) Ltd

March 2022 – November 2022

- FinTech platform: Contributed to a real-time financial data platform (Pro11) used by 100+ corporate clients, working on data-driven UI features.
- Reliability: Resolved production bugs and implemented new features under senior engineer review, maintaining system stability on a live client-facing platform.

EDUCATION

MSc in Artificial Intelligence

Reading

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology, specializing in Software Engineering

Feb 2020 – March 2024

Sri Lanka Institute of Information Technology (SLIIT)

Second Class · Dean's List Award 2022

SKILLS

Python, Java, JavaScript, TypeScript, SQL, CNNs, Image Processing, LLM integrations, RAG, AI Agents, React, Redux, Spring Boot, REST APIs, MQTT, Microservices, Vector Databases, AWS (Essentials), Git, Agile, Docker

PROJECTS

RAG-based Document Q&A

React, NestJS, Qdrant, Embedding Models, LLM Integration

- Built a full-stack RAG application that lets users upload a PDF and ask natural-language questions about it, implementing the full pipeline. PDF parsing, chunking, embedding generation, vector storage/retrieval in Qdrant, and LLM-based answer generation with cited source passages.

CRM Platform | TS Technologies (Pvt) Ltd

React, Zustand, Bootstrap, Spring Boot, MySQL

- Developed and maintained an end-to-end sales and service CRM, streamlining the customer journey from initial engagement through post-service follow-up.

Employee Retention Prediction

Python, Machine Learning, Pandas, NumPy, Scikit-learn, Matplotlib

- Built a classification model to predict employee attrition from historical HR data, including feature engineering and exploratory data analysis to identify key retention drivers.

Pro11 (Associated with DirectFN (Pvt) Ltd)

Emberjs, Bootstrap, Sass, Javascript

- Contributed to the development of a fintech solution designed to provide merchants with real-time financial data, analytics, and tools for decision-making, enhancing efficiency and market insights
